To whom it may concern,
I use and benefit from XM Satellite Radio traffic and weather channels. Living and working in Los Angeles and traveling for work, I rely heavily on this service. XM Satellite Radio is the best medium as it's available any / everywhere I go. There is a variety and quality that's not available anywhere else. I pay for this service and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. Respectfully, I urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I require and count on each day.

Kind Regards,
-Jim Collins
